

# Why Settle for Average When it Comes to Managing Risk Based Contracts?

Legacy risk management tools help you understand average population risk – *but no one in your population is average.*

Milliman PRM provides EXCEPTIONAL analytics for EXCEPTIONAL organizations

- BENEFICIARY PROFILES
- PROVIDER SCORECARDS
- PERFORMANCE DASHBOARDS
- POPULATION CAMPAIGN PULL THROUGH

*PRM analyzes the clinical characteristics of each patient and predicts both actuarial risk and the opportunity that may be derived from managing that patient. PRM is used by care coordinators, medical directors, physicians, and other professionals who want to know which patients are 'going to be their biggest problems' before potential problems occur. This risk-based approach to patient stratification is based on PRM's proprietary Opportunity Prospective Scores. PRM does all the analytics so you can focus on what's important - patient care.*

PRM Analytics uses Advanced Machine Learning and Predictive Analytics to help you win under Risk-based Contracts.

## Milliman PRM Analytics

“And the best part is that Milliman PRM is identifying patients who the medical community would’ve given up on.”

*Physician Customer, Florida ACO*

“We looked at products from industry leading companies to help us measure our performance and plan our future in our ACO business. No one comes close to PRM.”

*CEO, Indiana IPA*

“One of the most rewarding benefits we’ve achieved through the use of PRM is the remarkable improvement in our patients’ quality of life.”

*CEO, Florida ACO*
